EDUCATION

University of British Columbia

Sep. 2022 – Expected Dec. 2027

B.Sc. Integrated Sciences in Computer Science & Data Science

Vancouver, BC

- Interdisciplinary focus in HCI, user-centred design, data science, and AI, with hands-on experience in user research, experimental design, usability evaluation, statistical analysis, and interactive prototyping.
- **Relevant Coursework:** CPSC 444 (Advanced HCI), CPSC 344 (HCI / User Research), CPSC 330 (Applied ML), CPSC 304 (Relational Databases), CPSC 210 (Software Construction), DSCI 310, and STAT 305.

SKILLS

UX/UI Design & Prototyping: Figma, FigJam, Figma AI, Wireframing, Interactive Prototyping, Information Architecture, User Flows, Cross-Device Design

UX Research & Evaluation: User Interviews, Survey Design, Think-Aloud Studies, Usability Testing, Cognitive Walkthroughs, Task Analysis, Observational Studies

Research & Data Analysis: Experimental Design, Thematic Analysis, Qualitative Coding, Affinity Mapping, Behavioral Metrics, Descriptive Statistics, ANOVA, Correlation Analysis

Technical Tools: Python, R, SQL, ggplot2, tidymodels, Qualtrics

PROJECTS

Tenant Town – HCI Research Study | [Prototype](#) | [Demo](#)

Jan. 2026 – Apr. 2026

- Collaborated in a five-person team to design and evaluate **two cross-device Figma prototypes** for a tenant-support platform, translating interview and questionnaire findings into user-centred design requirements.
- Conducted mixed-method usability testing with **10 participants** across mobile and desktop, measuring task-completion time, misclicks, backtracks, and qualitative feedback.
- Applied quantitative and thematic analysis to develop evidence-based information architecture recommendations; structured navigation showed **76% fewer average mobile misclicks (0.8 vs. 3.4)**.

Neighborhood Notebook – HCI Design Project | [Design Process](#) | [Prototype](#)

Sep. 2025 – Dec. 2025

- Designed a map-based discovery app for Vancouver newcomers, translating user needs into **design requirements, task flows, and interactive Figma prototypes** through an iterative HCI design process.
- Conducted cognitive walkthroughs, **3 pilot sessions**, and think-aloud usability testing with **9 participants**, combining behavioral observations and post-task questionnaires to evaluate navigation, filtering, and review workflows.
- Translated research findings into refinements to filtering, navigation, and content-sharing flows; **8 of 9 participants** found the filtering and sorting controls easy to locate.

[SyncFlow](#) – Winner, 2025 Product Sprint

Mar. 2025

- Designed an **AI-assisted productivity platform** using Figma and Figma AI, applying task analysis, workflow modelling, and iterative UX refinement to improve team collaboration.
- Developed **user journeys, information architecture, and interactive workflows** in a time-constrained team sprint, converting user needs into a testable product concept.

[Subletify](#) – Personal UX/Product Project

Jan. 2025

- Mapped end-to-end student housing and subletting journeys through **task analysis and stakeholder feedback**, translating user pain points into onboarding requirements, user flows, and information architecture.
- Designed **AI-assisted onboarding and content workflows** to improve listing clarity, discoverability, and user trust, iterating the web experience based on feedback from student users.

EXPERIENCE

VP External & Marketing

Mar. 2026 – Present

Residence Hall Association (RHA), UBC

Vancouver, BC

- Lead cross-council communications and stakeholder initiatives across **10 residence councils** serving a network of **14,000+ residents**; collaborate with **UBC departments, AMS, and North American university partners** to deliver coordinated campaigns and resources while mentoring council executives.

Corporate Relations Chair

May 2023 – Apr. 2024

UBC Science Undergraduate Society

Vancouver, BC

- Managed **30+ corporate and community partnerships**, including Red Bull and the BC Lions, developing tailored outreach materials and securing **\$7,000+ in sponsorships** for large-scale student initiatives.
